<b>Education</b>	University of California, Davis (2012 - 2018) <ul style="list-style-type: none"> <li>Ph. D. Physics (Dec 2018)</li> <li>M. S. Physics (Dec 2013)</li> </ul>	St Mary's College of California (2007 - 2011) <ul style="list-style-type: none"> <li>B. S. Physics, Minor: Mathematics</li> </ul>
<b>Computing</b>	Python (proficient), C/C++ (intermediate), Go (intermediate), Javascript (intermediate). Git, Python scientific/data vis stack (contributor to scipy, numpy, jupyter, conda, ...). Dashboarding with panel, bokeh, plotly. Web development with FastAPI, Django REST, frontends with React.	
<b>Skills</b>		
<b>Experience</b>	<b>Quansight</b> · Arcata, CA <i>Senior Software Engineer</i>	May 2021 - Present
	<ul style="list-style-type: none"> <li>As part of Quansight's consulting branch, delivered custom-built solutions to meet a wide range of customer needs, most of which were open source contributions to upstream Python packages in the scientific Python ecosystem. In addition to being technical lead for numerous projects, I also acted as a personnel manager for a team of Quansight developers from around the globe.</li> </ul>	
	<b>Voltaiq</b> · Berkeley, CA <i>Software Engineer</i>	Oct 2019 - May 2021
	<ul style="list-style-type: none"> <li>Developed and deployed bespoke production-quality data analysis and visualization tools to provide quantitative insight into battery performance for some of the world's largest battery manufacturers using Django (with Django REST Framework), Plotly.js, and React.</li> </ul>	
	<b>Tampere University</b> · Finland <i>Postdoctoral Scholar</i>	Jan 2019 - Aug 2019
	<ul style="list-style-type: none"> <li>Simulated nanoscale magnetic materials on the <a href="#">CSC's</a> Taito-GPU supercluster using a combination of open source software and in-house code (Go, CUDA, and Python). Numerical calculations of domain wall motion were compared to an analytic model <a href="#">[Skaugen 2019]</a>.</li> </ul>	
	<b>UC Davis Department of Physics</b> · Davis, CA <i>Graduate Student Researcher</i>	Aug 2012 - Dec 2018
	<ul style="list-style-type: none"> <li>Developed <a href="#">PyFORC</a>, a Python-based suite of open source tools for analyzing and visualizing magnetic measurements using the First-Order Reversal-Curves (FORC) technique.</li> <li>Streamlined the Liu group's material analysis pipeline by developing <a href="#">tarmac</a>, a Python library for quickly visualizing Markov-chain monte carlo (MCMC) samples. This library makes it simple to identify correlations between parameters in a statistical model and evaluate convergence during fitting.</li> <li>Fabricated and characterized a wide range of nanoscale magnetic materials, including nanoparticles, thin films, single crystals, and patterned nanostructures using a variety of cutting-edge techniques. Programmed data acquisition and instrument control software for crucial laboratory equipment.</li> </ul>	
	<b>Lawrence Berkeley National Laboratory</b> · Berkeley, CA <i>Junior Specialist</i>	May 2011 - May 2012
	<ul style="list-style-type: none"> <li>Created control software (C++ and Qt) for automated circuit testing. Hardware tested with this system was deployed as part of the <a href="#">Insertable B-Layer system</a> at the Large Hadron Collider in 2014.</li> </ul>	
	<b>St. Mary's College of California</b> · Moraga, CA <i>Research Assistant</i>	Sep 2010 - May 2011
	<ul style="list-style-type: none"> <li>Classified astronomical data from the Arecibo Observatory as part of the <a href="#">ALFALFA Collaboration</a>.</li> </ul>
