

<b>Education</b>	University of California, Davis (2012 - 2018) <ul style="list-style-type: none"><li>Ph. D. Physics (Dec 2018)</li><li>M. S. Physics (Dec 2013)</li></ul>	St Mary's College of California (2007 - 2011) <ul style="list-style-type: none"><li>B. S. Physics, Minor: Mathematics</li></ul>
<b>Computing</b>	Python, C/C++, Go, Javascript, Rust. Python scientific/data vis stack (contributor to <code>scipy</code> , <code>numpy</code> , <code>jupyter</code> , <code>conda</code> , ...). Dashboarding with <code>panel</code> , <code>bokeh</code> , <code>plotly</code> . Web development with FastAPI, Django/Sqlalchemy ORMs, frontend experience with JS/TS, React. Testing with <code>pytest</code> , <code>hypothesis</code> . Git for version control.	
<b>Skills</b>	Agile Development, Automated Testing, Simulations, Continuous Integration, Data Analysis, Statistics, Visualization, Linux, Python Data & Visualization Ecosystem ( <code>numpy</code> , <code>scipy</code> , <code>pandas</code> , <code>jupyterlab</code> , <code>matplotlib</code> , ...) including coding at C/Python and Rust/Python interfaces; Bayesian parameter estimation, HPC ( <code>slurm</code> ), Distributed Computing, VTK.	
<b>Experience</b>	<b>Quansight</b> · Arcata, CA <i>Senior Software Engineer</i> May 2021 - Present <ul style="list-style-type: none"><li>As part of Quansight's consulting branch, delivered custom-built solutions to meet a wide range of customer needs. Much of this work consisted of open source bug fixes, feature development, and maintenance for critical packages in the Python scientific ecosystem, including <code>jupyter</code>, <code>scipy</code>, <code>numpy</code>, <code>conda</code>, the <code>tensorflow</code> ecosystem, and many smaller projects; see my <a href="#">GitHub profile</a> for examples of my work. As technical lead I designed architecture, led development, and delivered solutions on time and within budget. I also acted as a personnel manager for a team of developers from around the globe.</li></ul>	
	<b>Voltaiq</b> · Berkeley, CA <i>Software Engineer</i> Oct 2019 - May 2021 <ul style="list-style-type: none"><li>Developed and deployed bespoke production-quality data analysis and visualization tools to provide quantitative insight into battery performance for some of the world's largest battery manufacturers using Django (with Django REST Framework), <code>Plotly.js</code>, and <code>React</code>.</li></ul>	
	<b>Tampere University</b> · Finland <i>Postdoctoral Scholar</i> Jan 2019 - Aug 2019 <ul style="list-style-type: none"><li>Simulated nanoscale magnetic materials on the <a href="#">CSC's</a> Taito-GPU supercluster using a combination of open source software and in-house code (Go, CUDA, and Python). Numerical calculations of domain wall motion were compared to an analytic model <a href="#">[Skaugen 2019]</a>.</li></ul>	
	<b>UC Davis Department of Physics</b> · Davis, CA <i>Graduate Student Researcher</i> Aug 2012 - Dec 2018 <ul style="list-style-type: none"><li>Developed <a href="#">PyFORC</a>, a Python-based suite of open source tools for analyzing and visualizing magnetic measurements using the First-Order Reversal-Curves (FORC) technique.</li><li>Streamlined the Liu group's material analysis pipeline by developing <a href="#">tarmac</a>, a Python library for quickly visualizing Markov-chain monte carlo (MCMC) samples. This library makes it simple to identify correlations between parameters in a statistical model and evaluate convergence during fitting.</li><li>Fabricated and characterized a wide range of nanoscale magnetic materials, including nanoparticles, thin films, single crystals, and patterned nanostructures using a variety of cutting-edge techniques. Programmed data acquisition and instrument control software for crucial laboratory equipment.</li></ul>	
	<b>Lawrence Berkeley National Laboratory</b> · Berkeley, CA <i>Junior Specialist</i> May 2011 - May 2012 <ul style="list-style-type: none"><li>Created control software (C++, with a Qt-based GUI) for automated circuit testing. Hardware tested with this system was deployed as part of the <a href="#">Insertable B-Layer system</a> at the Large Hadron Collider in 2014, enabling continued studies of the Higgs boson.</li></ul>	
	<b>St. Mary's College of California</b> · Moraga, CA <i>Research Assistant</i> Sep 2010 - May 2011 <ul style="list-style-type: none"><li>Classified astronomical data from the Arecibo Observatory as part of the <a href="#">ALFALFA Collaboration</a>.</li></ul>	

<b>Teaching</b>	Teaching Assistant, <b>Physics Department, University of California, Davis</b>	2012 - 2016
	Student Tutor and Live-In Mentor, <b>Dept. of Physics, St Mary's College of California</b>	2010 - 2011
<b>Laboratory Skills</b>	<i>Fabrication</i>	
	Sputtering, e-beam evaporation, and e-beam-/photo-lithography and lift-off.	
	<i>Magnetic Characterization</i>	
	Vibrating sample magnetometry (VSM), magneto-optic Kerr effect (MOKE), SQUID magnetometry, and magnetoresistance.	
	<i>Other Techniques</i>	
	X-ray diffraction (XRD), reciprocal space mapping (RSM), scanning electron microscopy (SEM), polarized neutron reflectometry (PNR), x-ray absorption spectroscopy (XAS) and magnetic circular dichroism (XMCD), and electrical techniques including Hall effect and van der Pauw resistivity methods.
